

The Debenham Project – “A New Horizon” – A Public Meeting  
7.00 pm Monday May 15<sup>th</sup> 2023  
Debenham Community Centre

Hi everyone,

After our review to explore what has been achieved since the Project was set up in 2009 - what's working well, what we could improve, and what we would like to do in the future - please join us in celebrating its success and hear about how it will continue to offer its very special form of care and support for many years to come.

April 15<sup>th</sup> is a particularly special day for us to relaunch The Debenham Project and its vision for the next decade (and beyond) as it is also the start of:

Dementia Action Week

The one week in the year when across the nation we highlight all the brilliant efforts and activities to increase the awareness of dementia, and on what we can and are doing to support all family carers and those they care for who are living with the impact of the illness on their lives.

Dementia is the greatest challenge since the creation of the NHS for the health and wellbeing of us all, and especially for our elderly family members, friends, and neighbours. Virtually no-one, old or young, has not been touched by it. Currently, there are no cures, and clinical treatments to delay or alleviate the symptoms are limited.

The aim of The Debenham Project is offer:

Caring in our Community  
Caring for our Community  
Caring by our Community

We know that it makes a big difference.

With all my best wishes,

Lynden Jackson
